

World-Class  
Products with  
World-Class  
Service.

#### **COMPANY INTRODUCTION:**

Goma Protect Pvt. Ltd. is a premium company of the fencing and gabion industry. Since the day of inception in the year 2013, the company is committed to its customers. In this short span of functioning, Goma Protect has proved its ability by providing exclusive products developed to satisfy customer needs. The products manufactured and supplied by Goma Protect have the quality unparalleled and in compliance with the international standards. The core objective of the company is to provide world class products and services. Goma Protect Pvt. L:td. (GPPL) is the manufacturer of the gabion wire mesh, chain link fencing, barbed wire and many more fencing products. The company has it's headquarter and production unit located at Ahmedabad.

#### **VISION & VALUES:**

We strive to provide the best suited solution for Geo-technical, Road Railways, Hydraulic & Environmental problems using our range of products and services.

We want to be recognized as...

At GPPL, it is our goal and vision to become a leading company with unrivaled repute in all of the following areas:

Quality Workmanship • Intuitive/Easy Buying Process • Customer Support and Service • Speed of the Service • Quality Products and Durability

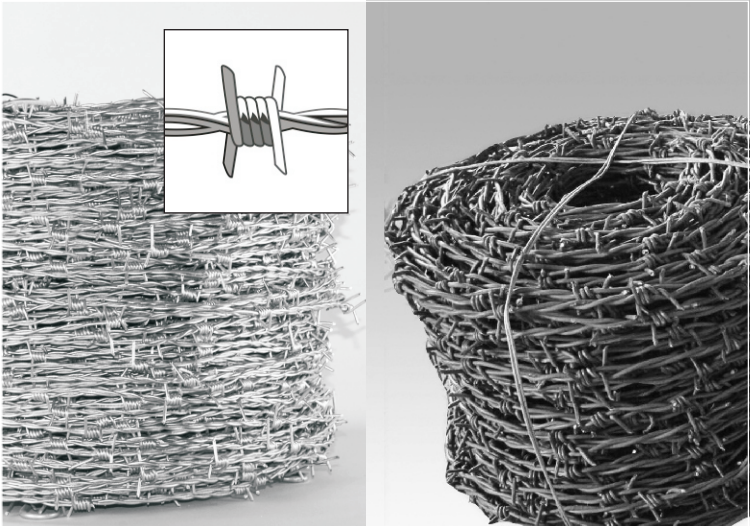

How we envision our journey 5 years from now...

Over the next ten years, it is our goal to become one of India's leading fence construction companies along with progressing into the international market. We very well understand that we cannot reach to such a status without strong values, reliability, and approach; and we believe that this is exactly what you will experience when working with GPPL!

# BARBED WIRE

also available in PVC Coated

- High tensile barbed wire lasts two times longer than heavily galvanized wire.
- Supplied on wooden reels for strength and ease of disposal, and with hessian handles to be easier to carry.
- Ideal for the use on top or bottom of stock fencing, as a three or five strand cattle fence or for the use with security fencing.
- The product uses thicker line wires than standard high tensile barbed wire for added strength and durability.

## Advantages:

- Low cost and inexpensive.
- Sharp barbed wire acts as an effective deterrent for intruders, cattle and wild animals.
- Transparent and do not obscure sunlight from either side of the fence due to open weave structure.
- One of the most sought of fencing solution.
- Ideal for securing properties such as house and business premises.
- Barbed wire used for farm fencing is ideal in keeping animals and wild life from roaming around outside the borders of the farm.
- PVC coated barbed wire are also corrosion resistant.

# Applications:

Barbed wire finds extensive usage in various industrial & non-industrial applications. It is predominantly used for fencing purposes as it is fabricated in such a manner that it has sharp edges or barbs arranged at intervals along the strand making it difficult for a human or animal to breach the entry. It is generally used to construct fences around the borders of a property or to provide enhanced security to building & other private properties.

## Specifications:

No.	Length (m)*	Wire diameter (m)*	No. of Barbs	Tensile Strength (N/mm <sup>2</sup> )	Spaces between Barbs*(mm)
1	200	2 - 3	4	Min 350	150
2	100	3 - 5	2	Min 350	100

\*Size may vary as per client's requirement and availability of products. PVC coated barbed wire is available.

## The product finds its application in:

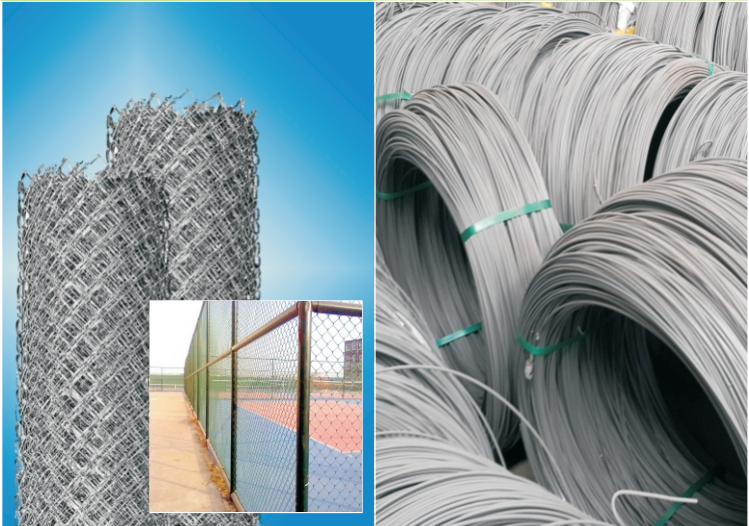

- Border Areas
- High Security Zones
- Railways
- Highways
- Factories
- Trench Warfare
- Group Housing Societies
- Godown & Warehouses
- Airports
- Embassies & VIP Areas
- Schools & Colleges
- Prisons
- Agriculture
- Animal Husbandry
- Grass Boundary
- Roads & Highway Protection

# CHAIN LINK FENCE

also available in PVC Coated MSGI Wire

PVC coated chain link fence with galvanized wire cores.

- Chain link fence is produced from galvanized wire with a protective organic coating. It is produced with either defensive barbs along with one edge and knuckles along with other edge, knuckless along both edges.
- It has semi tight wound for the best flexibility in both transportation and erection.

## Advantages:

- Convenient and Flexible for installing along with the landscape
- A long-lasting smooth surface
- Perfect adhesion
- No peeling no cracking
- Remarkable concentricity of the coating
- Extended lifetime, obvious economic advantage
- Functions in perfect harmony with the environment
- Cost Effective and Lighter
- Most widely used fencing solution

# Applications:

- Commonly used in the field of architecture with applications in residences, gardens, playgrounds and can also be used for security purposes
- Road, Railway, Highway fencing
- Fencing of factories, farms, houses, poultry farms & animal enclosures
- Roof support in long wall mining

## Specifications:

No.	Mesh Size (mm)	Wire Diameter (mm)	Height (m)*
1	25 x 25	2.0 - 4.0	6
2	50 x 50	2.0 - 4.0	6
3	65 x 65	2.0 - 4.0	6
4	75 x 75	2.0 - 4.0	6
5	100 x 100	2.0 - 4.0	6
6	150 x 150	2.0 - 4.0	6

Size may vary as per client's requirement and availability of products.
